Profile

Strong background in Backend Development, with hands on experience working on 15+ projects, which includes Low-Level Design and REST APIs. Looking forward for challenging projects and delivering high-quality results.

Education

Java Back-end Development, *Masai School*
May 2022 | Bangalore, India

Bachelor of Science, *Maharishi Dyanand University*
Jul 2018 – Apr 2021 | Rohtak, India

Technical Skills

Java • DSA • LLD • Maven • JDBC • SQL

Hibernate • Spring Boot • Spring Data JPA

Spring Security • Spring Cloud • Microservices

Junit • Mockito • Docker • Github

Soft Skills

Adaptive • Collaborative • Detail oriented

Interests

Chess • Horse Riding • Reading (Non-fiction)

Languages

Hindi (Native) • **English** (Professional)

Projects

Hotel Booking System REST API

Github ⬀ **:** Staywell Hotel Booking REST API is a collaborative project of team with 4 members, designed within 5 days.

Tech Stack: Java | Spring Boot | Spring Security | Spring Data JPA | Hibernate | Junit | Mockito | Slf4j | Lombok

Features: Logging | Validation | Unit Testing

Areas of responsibilities : Hotel module | Room module | Customer module | Reservation module

Food Order and Delivery REST API ⬀

Github ⬀ **:** Online food order and delivery REST API is a collaborative project of team with 4 members, designed within 5 days.

Tech Stack: Java | Spring Boot | Hibernate | JPA

Features: Swagger UI | Lombok | Validation

Areas of responsibilities: Registration | Login | Logout | Explore Items | Add to Cart | Order | Delivery | History

Bus Reservation Application ⬀

Github ⬀ **:** Bus Reservation Application is a Java Backend console based individual project, designed within 5 days.

Tech Stack: JAVA | MySQL | JDBC | Github

Features: ER Diagram | Operations | JDBC connectivity | SQL queries

Areas of responsibilities: Registration | Login | Logout | Search Bus | Filter Search | Book Tickets | Cancel Tickets | View Booked Tickets

KFC.com Clone ⬀

Github ⬀ **:** KFC.com clone is an online food ordering website. It is a collaborative project of team with 4 members, designed within 5 days.

Tech Stack: HTML | CSS | JavaScript | Netlify

Features: Explore Items | Browse Categories| Add to Cart | Place Order | Order History

Areas of responsibilities: Registration | Login | Logout | Home Page | Responsiveness
